

# DATABLEND HR & ERP INTEGRATION FOR CONCUR EXPENSE HRIS/HCM

DataBlend is an iPaaS (integration platform-as-a-service) solution designed exclusively to integrate the everyday applications relied on by finance and accounting departments.

Our niche focus allows us to bring value to end-users by automating data workflows, transformations, and uploads that would otherwise be manual and very time consuming. With DataBlend, there are no wait times for data to process, no data errors, and no rushing to close out month end reports.

DataBlend's secure cost-effective SAP Concur connector was designed to integrate with Concur Expense Human Resource Information Systems (HRIS/ HCM), ERPs, and more.

## HOW LONG DOES IMPLEMENTATION TAKE?

Standard implementations can be completed within four weeks depending on client responsiveness and number of applications integrated.

## SAMPLE AUTOMATED USE CASES FOR AN SAP CONCUR INTEGRATION

### Bi-Directional and Single Directional Workflows

- Creating and updating users between HR, Concur Expense, and ERPs
- Creating and updating lists between HR, Concur Expense, and ERPs

### Popular Applications to Integrate with SAP Concur

- Paylocity
- ERP Applications (Sage Intacct)

## ABOUT DATABLEND

DataBlend is an Integration Platform-as-a-Service (iPaaS) solution designed exclusively for CFOs, controllers, and their teams. Featuring a no-code, low-code workflow builder, DataBlend allows accounting and finance professionals to create secure and worry-free data integrations. Companies use DataBlend to collect and join data from multiple sources, build workflows (e.g. field-to-field mapping, pivot tables, and additional data transformations through virtually unlimited custom scripting possibilities), and schedule events so users are never without real-time data access. DataBlend's intuitive interface makes it easy to manage all application integrations from a single platform, eliminating the need to rely on IT resources to manage multiple, point-to-point connections.
